

# Introduction to NodeJS

## Week 1 - Day 4

---

### Topics Covered

1. A Simple HTTP Server
2. Serving HTML Files
3. Postman Tutorial

### A Simple HTTP Server

#### HTTP, fs and path modules

Node.js has a built-in module called **HTTP**, which allows Node.js to **transfer data** over the HyperText Transfer Protocol (HTTP).

Node.js includes **fs** module to access the **physical file system**. The fs module is responsible for all the asynchronous or synchronous file I/O operations.

The **path** module with methods that help you deal with **file and directory path names** on the machine's filesystem.
